Artist, as someone said that software development is not about creating beauty.

Hello, my name is Hugo. I'm a 20-year-old CS student in Santiago de Compostela. I write code as if I were writing a novel, making each word fit perfectly where it belongs. I like to get as close to the machine as I can when working on personal projects. Don't expect any fancy JS from me, nor ask for my opinion about modern software development.

EDUCATION

University of Santiago de Compostela

Santiago de Compostela, Spain

Computer Science (Engineering)

September 2023 — present

- Relevant Coursework: Data Structures, Software Development, Operating Systems, Math.

PROJECTS

Creator and Maintainer, Vicel

hugocoto.com/vicel

- Develop and maintain open-source spreadsheet TUI editor.
 - Manage PR reviews, bug fixes, and add new functionality.
- Ensure smooth and stable user experience.

ctml

github.com/hugoocoto/ctml

- C style html implemented using macros, with a tool that compiles it to native html.
 - Used in [my webpage](#).

Fetch

github.com/hugoocoto/fetch

- Suckless style computer specs fetcher (yet another neofetch alternative).
 - Fully customizable.

Todo

github.com/hugoocoto/todo

- TUI Todo list for my tasks. I develop it not as a project but as a necessity.
 - Embedded web server that hosts the tasks.

thread pool

github.com/hugoocoto/thread_pool

- Thread pool library written in C.
 - Not very optimized.

Piano

github.com/hugoocoto/piano

- Play piano from the terminal! (I still don't know how to play the piano.)
- Highly extensible, suckless-style configuration.
 - The trickiest C code I've ever written.

zmk-config

github.com/hugoocoto/zmk-config

- Zmk configuration for a 42 key Corne.

dv

github.com/hugoocoto/dv

- Manage files into a directory using posix REGEX.

memory allocator

github.com/hugoocoto/memallocator

- Memory allocator, same api as malloc but unoptimized.

CERTIFICATES

Cambridge English: First (FCE),

Aug 2022

SKILLS

- **Programming Languages:** Python, C, C++, Java, Bash, Lua, VimScript, Scheme, Typst.
- **Technologies:** Git, UNIX, Linux, Vim, Stack Overflow, Man Pages, Terminal.
