[Latest version of this document](#)

Artist, as someone said that software development is not about creating beauty.

Computer Science Student and disciplined athlete | Systems & Open Source Enthusiast 20-year-old student at USC with a strong foundation in low-level programming and observability. Passionate about building efficient software, mastering Linux environments, and solving complex algorithmic challenges.

EDUCATION

University of Santiago de Compostela

Computer Science (Engineering)

Santiago de Compostela, Spain

September 2023 — present

- Core Coursework: Data Structures, Software Development, Operating Systems, Math.

PROJECTS

Personal projects (github.com/hugoocoto)

Jun 2021 — present

- Open Source Contributions; you can see some of my projects in github.

Writings

<https://hugocoto.com>

- I have a webpage where I store some writings about coding and other topics.

EXTRACURRICULARS

HackUDC 2026

March 2026

- 3 days of programming and networking with a lot of interesting people.
- Awarded 1st place among 10 competing teams for developing a real-time observability solution focused on public tourism data in Galicia (Camino de Santiago).
- Engineered dynamic dashboards in Grafana to visualize regional datasets, providing actionable insights into pilgrim flows and infrastructure occupancy.
- Optimized data ingestion and representation to ensure low-latency monitoring of public information streams.

CERTIFICATES

Cambridge English: First (FCE),

Aug 2022

SKILLS

- **Programming Languages:** Python, C, C++, Java, Bash, Lua, VimScript, Scheme, Typst, Rust.
- **Technologies:** Git, UNIX, Linux, Vim, Stack Overflow, Man Pages, Terminal, Grafana.
